Map Node

Introducing

MapNode Decentralized, Web3, ISO (Initial Shop Offering), Metaverse.

- We are a group of builders in the US who want to build a decentralized financial ecosystem in the F&B sector. operating according to the type of hotel, restaurant, lounge, cafe, pub, discotheque, bar).
- Products make it much easier for traditional financial users to access services.
- Map Node provides the foundational building layers for a new digital economy with following products: stable-coin, crypto/fiat, DEX, launchpad, lock liquidity and lock token and connecting crypto to the real world.

Why MapNode

ETH Compatibility

ETH Compatibility Industry dominance, established tech stack, tools, languages, standards, enterprise adoption

Security

Security Modular "security as a service", provided either by Ethereum or by a pool of professional validators

Scalability

Scalability Dedicated blockchains, scalable consensus algorithms, custom Wasm execution environments

High Mining Productivity

Map Node PoS is a layer 2 scaling solution that achieves unprecedented transaction speed and cost savings by utilizing side-chains for transaction processing. Profit from 20% to 25% per month, specially profit paided by Map Node Token

30+ Person Team

30+ person team with deep resources and proven track record. Map Node is run by a fully integrated team with a long term vision, and core team members have built successful blockchain projects and have experience at leading blue-chip consulting and finance institutions

Extensive Partnerships

Extensive partnerships with market leading blockchain institutions ensuring broad scale and seamless experience. Within only a few weeks MapNode has secured partnerships with Chainlink, Brave, Grape, Altura and five secondary marketplaces

Scale & Power

Map Node PoS is a layer 2 scaling solution that achieves unprecedented transaction speed and cost savings by utilizing side-chains for transaction processing. At the same time, POS ensures asset security using the robust Plasma bridging framework and a decentralized network of Proof-of-Stake (PoS) validators.

Speed

Intuitive, efficient bridging, deposit and withdrawals. Transaction speeds of up to 65,000 tx/s means exponentially faster performance than Ethereum at 15 tx/s. Non-custodial architecture means users have control of their keys. Rely on the shared security of Ethereum with benefit of Map Node's speed

Scalablility

Compatible with major ERC standards. Secured by validators and checkpoints submitted to Ethereum. Minimal downtime over the course of 1.3B recorded transactions. A powerful and engaged community driving adoption and user engagement

Flexibility

Full EVM compatibility means deploying your smart contracts directly on the Map Node chain. A composable blockchain means you've got a wide variety of apps to build on. Easy transfer to and from Map Node and Ethereum. Easy-to-use wallet on web and mobile.
